S-2 Command Chronology

1. SIGNIFICANT EVENTS. On 6 March 1966, the CHIEU HOI Center in DANANG, informed us they had 5 ralliers in their possession who had information on 2 additional ralliers in the 3^d Battalion ZOA who wanted to rally. After interrogation, the 5 ralliers accompanied by a Marine patrol to the designated location and met the 2 ralliers. In addition, the 2 ralliers surrendered 5 M-79 rounds, 1 M-26 grenade, 1 steel helmet, 1 flashlight (US), and 1 cartridge belt (see 151215H, entry INTSUM # 4).
2. NEW DEVELOPMENTS. None.
3. PROBLEM AREAS. At the present time there are 5 interpreters assigned to this battalion, 1 of whom was wounded and is presently in an ARVN hospital. The shortage of interpreters has made collection of information from indigenous personnel, the proper functioning of the civil affairs program, and liaison with local Vietnamese forces, difficult. It is felt that 9 interpreters is the minimum required by an infantry battalion, with the ideal being sufficient interpreters to allow assignment of one per infantry platoon, with 3 additional at the Battalion C.P. for use by the Command Group and S-2 during field operations, the Battalion Aid Station, Chaplain, and Civil Affairs Officer in the Battalion People to People program.
4. WEATHER. Weather in the Battalion ZOA was moderate to clear during the reporting period, and did not appreciably influence any of the activities of this battalion. A total of .4 inches of rain was recorded during the month of March, which is a decrease of 2.0 inches from February.
5. INTELLIGENCE SUMMARY.
 - a. VC activity during the month of March decreased over the month of February. Activity in the Battalion ZOA consisted mainly of mine and surprise firing device incidents, and isolated small arms incidents by individuals or small groups ranging in number from 1-10.
 - b. The major exception was on the night of 24/25 March when "E" Company 2/9 (Opcon 3/3) encountered an estimated 2 VC mainforce companies of the R-20 Battalion. The action resulted in 43 VC KIA by body count (see 250030H, entry INTSUM # 61, 251600H, entry INTSUM # 71, Additional Information entry INTSUM # 72, and 261700H, entry INTSUM # 73).
 - c. There were 98 VC initiated incidents in the Battalion ZOA during March, as compared with 155 during February. These incidents consisted of :
 - (1) 56 Incidents of small arms compared to 69 in February.
 - (2) 37 mine/surprise firing device incidents compared to 69 in February. This figure includes those detonated as well as those discovered and destroyed.

(3) 5 close-in infiltration attempts compared to 6 in February. These consisted of VC who infiltrated to within hand grenade range, or who were detected attempting to get through defensive positions.

6. TARGET INFORMATION. None.

7. DAILY INTELLIGENCE SUMMARIES. Attached as Appendix (1), (original only).

8. SPECIAL INTELLIGENCE REPORTS. None.

9. A.O. REPORTS. None.

10. PRISONER REPORT.

a. There were 63 VCS apprehended and evacuated to ITT during March as compared to 47 during February.

b. There were 19 VCC (5 by PF units operating our ZOA) during March as compared to 10 during February.

11. ENEMY CASUALTIES.

a. There were 79 VC killed by body count in the Battalion ZOA during March, as compared to 33 killed during February. This total includes 2 VC killed by PF units operating in our ZOA.

b. There were an estimated 229 VC probable KIA or WIA during March as compared to 28 during February. This is a result of searching VC positions, and observing pools or trails of blood indicating VC casualties. This figure also includes those VC indicated by villagers as having been killed or wounded and carried out of the area by other VC.

12. CAPTURED EQUIPMENT OR SUPPLIES.

a. The following weapons were captured during March:

- 5 7.62MM CHICOM carbine rifles
- 3 M-1 rifles

- 2 AK assault rifles # 56
- 1 BAR

- *1 US carbine
- *1 .38 pistol
- 47 hand grenades (M-26, CHICOM, etc)

SPECIAL REPORT

VC Directional Mines

There is evidence that VC have been modifying conventional shaped charges to utilize their blast effect horizontally as directional mines. Several such mines have been uncovered and destroyed in the third Marines T.O.R.

All units upon capture or uncovering of shaped charges, or other suspected directional mines, report same immediately to this headquarters and to engineer/EDM unit most available. All such mines recovered will be destroyed only in connection with meeting test requirements by competent personnel.

If recovering such charges or directional mines is impractical, commanders should destroy them on spot for safety of troops. However, all suspected directional mines so destroyed will be specifically described in spot reports and unit reports and unit INFOSUMs.

Annex B (Intelligence) to Operation Plan 4-66.

Time Zone: H

1. On 6 March, a Mr. Kelley, American representative to the I Corps CHIEU HOI program, informed Swain-2 through Senator-2 that 5 Viet Cong who had rallied from our ZUMA (vicinity AT 9863) were in his possession, and offered information which he felt would be of use to this battalion.
2. Upon interrogation by Swain-2, it was learned that there are 3 additional Viet Cong in the hamlet of BICH BAC (AT 987630) who wish to rally. Communication is being maintained with the Viet Cong, and arrangements are being made, in conjunction with Operation Plan 4-66, to meet the Viet Cong in the hamlet of BICH BAC, and return them to GVN control.
3. The ralliers indicated they will lead the Marines to a tree line in the hamlet of BICH BAC in which Viet Cong hide from Marine patrols, and in which Viet Cong rest when Marines aren't in the area. They indicated only 4 Viet Cong (not including the 3 who want to rally) are operating in BICH BAC, with the primary mission of making, and positioning mines and surprise firing devices in that area. They continued to say that most of the Viet Cong left the BICH BAC hamlet area when the Marines moved to Hill #55, and the HA LONG bridge.
4. Four of the ralliers told of a large tunnel complex located in the vicinity of LE SON (5), (AT 955637). One rallier stated he spent 2 days in the tunnel as a laborer. The tunnel was described as being 400 meters in length, having 3 entrances, and located approximately 100 meters from the SONG YEN. The 4 continued that some 25 Viet Cong are operating in the area, each having a personal weapon.

5. On 15 March, the 5 ralliers, Swain-2, Vietnamese Liaison Officer and 2 scouts will accompany the Company "I" patrol to search out the above mentioned areas. The ralliers accompanying the patrol will be dressed in green utilities and helmet liners to disguise their identity. Mr. Kelley, the Chief of the CHIEU HOI program (D. NANG area) and 1 interpreter from the CHIEU HOI center will remain on Hill #55.

6. ITEM: Tactical use of Cs/CN gas.

DISCUSSION: Large cane fields make excellent hiding places for VC and provide good cover from many weapons. They are difficult and dangerous to search. CS/CN gas grenades used as rifle grenades allow quick and effective checks of cane field.

RECOMMENDATION: More Cs/CN should be employed as rifle grenades to check cane fields. Wind direction must be considered when employing Cs/CN in this manner.

7. ITEM: Search and destroy operation of enemy areas.

DISCUSSIONS: When on search and destroy operations the area assigned is often too wide for an effective search, allowing VC to escape by hiding between units involved.

RECOMMENDATION: That limited areas be assigned for search and destroy operations allowing a thorough search of the entire assigned area.

8. ITEM: Addition of 12 M-79 grenade launchers to TL of H&S Co

DISCUSSION: While in Vietnam, H&S Co has frequently been called upon to commit a tactical platoon. With the proven success of M-79 grenade launcher in Vietnam it would be of great benefit for H&S to have these weapons as authorized TL weapons for employment. In addition to M-79's being employed by the H&S tactical platoon when it is operationally committed, the M-79 grenade launcher could be employed on the defensive perimeter of the battalion C.A.

RECOMMENDATION: That 12 M-79's be added to the TL of H&S Co.

9. ITEM: Sparrow Hawk

DISCUSSION: When Sparrow Hawk is committed it is difficult for the company commander to initially control the inserted units on the ground by radio because of frequent communications difficulty with the new ground unit, and because of uncertainty of the unit's exact initial location. The Sparrow Hawk net generally becomes congested with traffic trying to keep the company commander informed so he can effectively control the operation. It would be to the company commander's advantage, and facilitate better control, if the UH 1E's escorting the M-34's would pick up the company commander at a pre-designated LZ given in the Sparrow Hawk request. The company commander would then be able to observe the ground units and effectively control them without tying up the net with frequent initial position reports.

RECOMMENDATION: That UH 1E's land at LZ designated in Sparrow Hawk request and pick up company commander prior to landing Sparrow Hawk ground units.

3/20/64

10. ITEM: Pre-Planned Fire Support.

DISCUSSION: It is not unusual for a patrol to be fired upon from three sides. The unit leader must make maximum use of his fire support to neutralize some of the fire while engaging the other. This fire support is needed within minutes to be effective due to nature of the VC hit and run tactics.

RECOMMENDATION: That pre-planned concentrations be used at all times and when possible the guns laid on same.

11. ITEM: Flashlights

DISCUSSION: Patrols are required to search out caves, tunnels, bunkers and other areas where visibility is limited. A small, waterproof flash light is needed in each fire team. The present Marine Corps flash light is not available in sufficient numbers and does not hold up under our present operating conditions.

RECOMMENDATION: That a waterproof durable flashlight be made available and issued down to the fire team level.

12. ITEM: Squad Radios.

DISCUSSION: The tempo of our operations (patrols, LP's, etc), and the close, dense areas in which we operate calls for good, rapid communications. Control is a must if we are to properly exploit the brief, sudden contacts with the VC.

RECOMMENDATION: That small, transistorized radios be made available at the squad level.

13. ITEM: Marking Rounds

DISCUSSION: There are many instances that call for the marking of targets for aircraft, other units, and at times other members of the same unit. Rice paddy and sugar cane areas frequently do not contain readily identifiable reference points (especially for aircraft).

RECOMMENDATION: That w.r. rounds be provided for the M-72 and the 106, and that a type of marking round for the M-79, possibly phosphorous, be developed for marking as well as killing purposes.

14. ITEM: Population Control

DISCUSSION: Identification of indigenous personnel is a continuing problem. ID cards in VC-controlled areas are outdated for the most part, and worthless even if official. (Many VC have proper, official identification.) Intimidation of those that are not pro-VC is a fact of life.

~~CONFIDENTIAL~~

RECOMMENDATION: That coordination be effected so that local village w.
(hamlet chief when possible) of known loyalties be used to identify all
persons for Marine units, before evacuation as VCS. (Interpreters and
PAT's cannot always make proper determination)
