S-2 CHRONOLOGY

1. SIGNIFICANT EVENTS. During June the Battalion displaced from the Da Nang Air Base (BI 004746) to its present location (AT 952726). The Battalion made the displacement during the period 13 - 16 June and assumed O&C of its present ZOA on 160800H, Jun 1966. The enemy activity consisted mainly of booby trap/mine incidents with the most significant activity being a PF unit's encounter with an estimated VC platoon on 182315H, in the vicinity of (AT 952701). This was the largest VC force encountered in the Battalion's ZOA during the period. Most encounters were with groups of 5 or less.

2. NEW DEVELOPMENTS. The first known incidents of sabotage/terrorism in our ZOA occurred on 280315H, when a charge of unknown size was detonated in a building, in which the future Village headquarters would have been located. A shaped charge (approx 20 lbs) had been rigged to the front of the building, but was not detonated. On 292325H, a flammable liquid (possibly AVGAS or JP-4) was poured on the bridge located at (AT 943-677) and set afire rendering the bridge unserviceable.

3. PROBLEM AREAS.

a. Interpreters. The shortage of interpreters, an ever continuing problem, is more acutely felt in our present ZOA (semi-cleared area) than in previous operations in uncleared areas. There is closer and much more frequent contact with local indigenous personnel in conjunction with the civic action/civil affairs programs. With the two (2) GAC platoons now operating and a third being formed, it is felt that one interpreter should be assigned to each of these platoons for effective liaison between the Marine and PF personnel assigned to these units. It is felt that minimum number of interpreters required by an infantry battalion is nine (9). The ideal would be sufficient numbers to allow assignment of one interpreter to each platoon and Company Commander (4 per Co) and 5 to the Battalion CP. Additional allowances must be made for Battalions having Vietnamese units operating within their ZOA, or who have mixed Vietnamese/Marines (such as the GAC platoons) units attached.

b. AM/TPS-21. The increase in allowance of one additional generator per set has partially solved this cause of set down time. The short life of some electrical components due to high temperatures and humidity is still a problem and replacement of the AM/TPS-21 is recommended as improved units become available.

4. Weather. During June there has been an increase in rain fall over the preceding month and increased periods of cloudiness with early morning haze and fog in the mountain valley areas. The maximum high temperature recorded during the month was 99° and the low recorded was 74°. There was a total of 4.8 inches of rain recorded.

5. INTELLIGENCE SUMMARY.

a. VC activity during June in the Battalion's ZOA was at a very low level, both at the Da Nang Air Base from the first through the fifteenth, and in our new ZOA from the sixteenth through the end of the reporting period. The primary VC activity during the month were nine incidents.

b. During the first half of the month while the Battalion was at the Da Nang Air Base, there were three VC initiated incidents. Two of these involved grenades being thrown at perimeter security elements and one was small arms fire.

c. During the second half of the month there were a total of 20 VC initiated incidents. No meaningful comparison can be made with previous periods as the Battalion moved into a new area on 16 June after having been assigned as Air Base Defense Battalion for the previous month and a half. The VC initiated incidents consisted of the following:

- (1) 14 mine incidents
- (2) 4 small arms incidents. Three of these incidents were with individuals or small groups. One incident was between a PF unit and an estimated VC platoon.
- (3) 2 incidents of sabotage/terrorism

* 6. DAILY INTELLIGENCE SUMMARIES. Attached as appendix 1 (original only)

7. SPECIAL INTELLIGENCE REPORTS. none

8. PRISONER REPORT.

a. There was 1 VCC apprehended during the month.

b. There were 5 VCS apprehended and evacuated to IFD or turned over to the Hieu Duc District Headquarters.

9. MINY CASUALTIES.

a. There were 2 VC killed by body count during June.

b. There were 2 VC wounded (probable) during June.

10. CAPTURED EQUIPMENT AND SUPPLIES. Captured weapons and equipment included 2 M-26 grenades, 2 Chicom grenades, 1 20 lb shape charge, and 1 directional mine. There were 3 105mm and 1 81mm rounds found and destroyed. Three of the rounds were missing and evidently intended for future use as booby traps or mines.

11. DESTROYED DEFENSES/POSITIONS. There were 4 tunnels and 5 punji pits destroyed during the period.

* No daily intelligence summaries were issued from the 1st through the 16th of June while the Battalion was at the Da Nang Air Base.

Provide two radio operators to Hieu Duc District Headquarters (AT 934689) as Battalion Liaison Team at that location. Maintain one alert platoon as Airbase Defense Battalion Reserve at Airbase Battalion CP on night of D-1.

(4) Complete displacement of U&S Co to new CP location on D-Day. Displace and maintain one section 81mm Mortar Platoon in general support at new CP location.

(5) Provide Battalion CP security at new location.

(6) Provide one corpsman to Vietnamese hospital at (AT 945698) at 1000H daily to assist with conduct of "sick call".

(7) Maintain one alert platoon trained and ready on call.

g. 81mm Mortar Platoon.

(1) One section direct support of Co I (Rein).

(2) One section direct support of Co K (Rein).

(3) One section direct support of Co L (Rein).

(4) One section general support.

h. Battalion Reserve: One rifle platoon, Co M (Rein).

(1) Be prepared to conduct such operations as directed.

i. Coordinating Instructions.

(1) See Annex A (Operation Overlay)

(2) Submit overlays of defensive positions and fire support plans by 1200H on D+2.

(3) Submit a schematic showing location of tactical and protective wire, Claymores emplaced, crew-served weapons positions, primary and alternate armored vehicle positions, and bunker positions by 1200H on D+4.

(4) Claymore mines emplaced must be covered by observation and fire at all times, to prevent removal or turning around. Claymores will be disarmed during daylight hours, unless attack is imminent. Report the coordinates of emplaced Claymores to this Headquarters within 48 hours of emplacement, except that patrols and ambushes not in a permanent or semi-permanent posture do not have to report Claymore weapons unless emplaced over 24 hours in duration.

(5) Make maximum utilization of listening posts within small arms range of defensive positions. Coordinate prearranged signals and routes of withdrawal for all listening posts and report location of listening posts to this Headquarters with daily patrol/ambush overlays. Listening posts will have positive means of communications (wire, radio, or both) with their parent units. Specific plans for re-establishing communications, in event of communications failure, will be developed before any listening post departs its parent unit's area. As a general policy, listening posts will not open fire except when necessary in own defense.

(6) Commanding Officers are directed to make maximum effective use of Scout-Sniper personnel in the conduct of all operations, and to report their performance in daily Situation Reports. Guidelines for the operational use of Scout/Snipers are:

(a) Scout/Snipers are not equipped for a regular infantry role and will not be used as such.

(b) Scout/Snipers are not equipped with snoper scopes and are not to be utilized in night operations. This is not intended to prohibit night time positioning of Scout/Snipers.

(c) Scout/Snipers will not be utilized unless accompanied by adequate infantry security.

(d) Whenever Scout/Snipers are utilized plans will include means of reinforcing or extracting them should the need arise.

(e) Company Commanders will select the areas in which Scout/Snipers will operate and will insure that they are utilized to the maximum extent possible.

(f) The smallest integral unit to be utilized operationally will be the two-man sniper team; plus infantry security.

(6) The positive communication requirements as specified in par (5) above apply to Scout/ Sniper units.

(7) As general policy, 75% of each unit's combat operations will be conducted during hours of darkness.

(8) The minimum size unit for a patrol is the squad, reinforced with a radio communications capability. At no time may any patrol number less than eight (8) men.

(9) All patrols will have an FO capability. A patrol is considered to have FO capability when the patrol leader has radio communication with his parent unit, and is capable of calling and adjusting supporting fires.

(10) Units will have designated elements prepared to immediately deploy to reinforce all listening posts, patrols and ambushes.

(11) Patrols, ambushes and isolated defensive positions will contain at least 8 men, and will have positive means of communication (wire, radio, or both) with their parent unit. Specific plans for re-establishing communications, in event of communications failure, will be developed before any of these combat activities depart its parent unit's area.

(12) Commanders shall establish a system of positive communication checks with all combat activities operating outside of or base camp locations. Such checks shall be conducted at least once each hour, as a minimum. Specific plans for re-establishing communications, in event of communications failure, will be developed before any combat activity departs its parent unit's area. Inform this Headquarters immediately when communications contact is lost with any subordinate unit.

(13) Patrol overlays will be submitted to this Headquarters (Attn: S-3) by 1200H daily and 96 hours in advance. Changes for patrol activities will be submitted to this Headquarters (Attn: S-3) by 1200H and 24 hours in advance of scheduled activity.

(14) All patrols must have checkpoints indicated on overlays. Checkpoints will be shown in black, and ambush sites in red, on patrol overlays.

(15) Rules of Engagement are in effect and are as follows:

(a) Individual.

1. Rounds will not be chambered in individual weapons unless contact with the enemy is imminent. The senior Marine present will determine if, in his judgement, this measure must be taken to preserve the lives of USMC personnel.

1. Initiation of any offensive or defensive formation implies imminent contact with the enemy.
2. Magazines will not be inserted in weapons in a camp area during daylight hours unless under attack.
3. During the hours of darkness the sequence of engagement will be:
 - a. Challenge
 - b. If the person challenged makes an overt attempt to avoid apprehension, opens fire or commits any other hostile act, and therefore endangers the life of the challenger, the challenger may load and fire.
 - c. Unit Commanders may prescribe illumination prior to firing if local circumstances allow.
 - d. The requirement for challenge may be waived by the local commander if required by the tactical situation and friendly forces are known to be in the area.

(b) Unit.

1. Supporting arms will not be fired into any populated area except when the infantry commander on the ground personally determines that such action is necessary to save Marine lives, and that there is no alternative to such a course of action.
2. All supporting arms missions except pre-planned barrages will be approved positively at the appropriate FSCC level prior to the use of supporting arms.
3. None of the foregoing is intended to deny the application of force against the source of hostile fires. Enemy forces engaging friendly troops will be destroyed by utilization of any available means.

(16) Rules of Engagement for traffic on waterways are in effect and are as follows:

- a. During daylight hours, watercraft not responding to hail or challenge are to be warned by firing warning shots into the air, or across the boat's bow.

If personnel in the boat perform a hostile act, or continue to commit an obvious attempt to avoid apprehension, units may open fire on boat.

b. During the hours of darkness, except for craft of U. S. and allied forces, any craft moving on inland waterways may be fired upon if there is a reasonable suspicion that it is transporting enemy personnel, weapons, or supplies. All friendly boats should be carrying a light during curfew hours in 3d Bn, 3d Marines Zone of Action.

c. All craft, except for those of U. S. and allied forces, are subject at any time to pursuit, detention and search if there is a reasonable suspicion that the craft are transporting or harboring enemy personnel, weapons or supplies.

d. Craft moving during daylight hours which are stopped and searched on the basis of reasonable suspicion will be permitted to proceed if the search produces negative results. Craft stopped and searched during the hours of darkness will be detained until daylight even if the search produces negative results.

(17) Curfew hours for indigenous personnel in 3d Bn, 3d Marines Zone of Action are from 2000H until 0500H daily.

(18) The pontoon bridge at (AT 946700) shall be closed to vehicular traffic each day at darkness, and re-opened the following morning only after the engineer minesweep detail has completed sweeping the road to the south of the bridge.

(19) Except under condition of emergency, no military vehicles are to proceed on roads within the 3d Bn, 3d Marines Zone of Action between the hours of 1900H daily and first light.

(20) Vehicles will not be permitted to proceed south of the pontoon bridge (AT 946700), or to the west of the road intersection at (AT 912743), unless in convoy of two or more vehicles and with a minimum of one "shotgun" per vehicle. Vehicles maintain adequate distances to minimize effects of mines and/or ambushes.

(21) No individual is to proceed alone from any unit position within the Battalion Zone of Action.

(22) Marines of this Battalion shall habitually employ the "Buddy System", as a minimum personnel security measure, within or outside the Battalion Zone of Action.

(23) Armored vests will be worn in all night defensive positions, and will be available for immediate use in all day defensive positions. Armored vests will be worn on all patrols, ambushes and offensive operations unless otherwise authorized by this Headquarters.

(24) On defensive positions in which bunkers are constructed, the general policy shall be that bunkers will be used for living/sleeping spaces, with adjacent fighting positions constructed from which Marines will fight.

(25) Employment of Supporting Arms.

(a) All artillery fires must be approved through this Headquarters.

(b) All 81mm preplanned on-call and H&I fires must be approved through this Headquarters.

(c) All prop fires must be approved through this Headquarters.

(d) All 60mm H&I fires must be approved through this Headquarters.

(e) 81mm illumination, WP and HE fires are to be requested and approved through this Headquarters, except in those cases in which the Company Commander deems an emergency to exist. In such cases, Company Commanders are delegated the authority to fire 81mm illumination, WP or HE fires in his Zone of Action, and to report subject fire missions to this Headquarters at the earliest opportunity.

(f) Barrages and defensive concentrations will be registered upon coordination and approval of this Headquarters.

(g) Units are to habitually register night defensive concentrations whenever possible when operating from patrol bases.

(h) Units will plan on-call concentrations along routes of all patrols and/or ambushes.

(i) All indirect fires of the 106mm Platoon, Tanks, and Jats must be approved by this Headquarters.

(j) Mortar positions will have air sentries posted whenever firing is in progress.

(k) Upon displacing to the new Zone of Action, the Company Commander may displace 60mm mortars at his discretion. 81mm Mortar sections attached to Companies I and K, and the 81mm Mortar Section in general support, will displace to new location in the new Zone of Action on order, on D-Day.

(1) In the employment of supporting arms, every effort will be made to preserve religious structures, medical facilities, public utilities, and cultural areas.

(m) Air Strikes.

(1) Submit all air requests to PSCG, this Headquarters.

(2) TACP or TAC (A) will control all close air support.

(3) Mark front lines with air panels and/or yellow or green smoke when conducting close air support.

(26) All units/patrols will carry air panels and be prepared to utilize SPARROW HAWK. SPARROW HAWK squad will be provided by 3d Marines.

(27) Fire coordination along the Song Yen River between 3d and 9th Marines units is as follows:

(1) Targets in and/or on the Song Yen River may be pursued by fire by either Regiment without prior coordination.

(2) Physical pursuit into and/or on the Song Yen River must have prior coordination.

(28) Submit operational reports to this Headquarters in accordance with reference (n), except that overlays are to be submitted 96 vice 72 hours in advance. Make Spot Reports as "Initial", "Amplifying" and "Final" whenever the situation allows.

(29) Rice captured during operations will not be destroyed, except under unusual circumstances, without prior approval of this Headquarters.

(30) All units continuously review counter-attack plans for their defensive positions.

(31) Emphasize camouflage measures in offensive and defensive activities.

(32) Emphasize communication security measures.

(33) Make maximum use of infra-red devices, AN/TTS-21, and seismic intrusion detection devices.

(34) Pay particular attention to providing adequate security for wire-men/wire teams when checking/installing lines; for engineers when wire-sweeping roads; and for mile/vehicle men in isolated areas.

(35) Reference (o) provides guidance for the use of fire and maneuver, cover and concealment, ambushes, reaction, and dispersion. All units continuously emphasize and demand tactical dispersion of troops.

(36) Reference (p) provides guidance for passive defensive measures in offensive operations.

(37) Reference (q) provides instructions and safety precautions for the use and handling of hand grenades. Dud hand grenades are to be blown in place by qualified personnel. Strict ammunition accountability is to be maintained among all units.

(38) RCA authorized within zone of action.

(39) Buying from local vendors is prohibited. Only authorized indigenous personnel are to be granted access to any unit position.

(40) This plan effective for planning on receipt; execution on order.

(41) DIRLAUTH all units.

(42) Tentative D-Day is 16 June 1966.

(43) Contact right to left.

(44) All units are instructed to leave Da Nang Airbase areas in a high state of police. Company Commanders inspect assigned Airbase sectors with incoming unit Commanders, and inform this Headquarters of the results of inspection.

4 4. ADMINISTRATION AND LOGISTICSa. Supply

- (1) Supplies and Equipment Available. No Change
- (2) Control and Distribution. Normal
- (3) Resupply
 - (a) Normal resupply of Rifle Companies will be by truck on a daily basis. H&S Company assigned one (1) truck for resupply of Mess Hall.
 - (b) Helo resupply of ammunition or other items not resupplied by truck to Rifle Companies will be scheduled on Mondays and Thursdays. Times to be designated. Days for Helo resupply are subject to change.
 - (c) Emergency resupply by Helo or Truck on call.

b. Evacuation and Hospitalization. No change.c. Transportation. See Annex D (MSR Overlay).

- (1) Six (6) trucks to be provided by 9th Motor Transport Battalion and dispatched therefrom on a daily basis.

1. SUMMARY OF THE ENEMY SITUATION.

- a. See Appendix 1 (Enemy Situation).
- b. Current INTSUMS as issued.

2. ESSENTIAL ELEMENTS OF INFORMATION (EEI).

- a. Will the enemy attack USMC positions within the TAO? If so, when, where, and in what strength?
- b. Does the enemy have any supply caches located within our Zone of Action? If so, where, what type supplies.
- c. Determine if the enemy has assembly and training area in our Zone of Action. If so, where?
- d. Does the enemy possess artillery and/or large caliber mortars? If so, where, what caliber? How many?
- e. Determine which villages/hamlets are most hostile to U.S. forces. If possible determine cause and what could be done to improve relations.

3. INTELLIGENCE ACQUISITION TASKS.

- a. Orders to subordinate units
 - (1) Establish a minimum of one Company O.P. during daylight hours, positioned to maintain maximum observation of Company's area of responsibility.
 - (2) Report, as obtained, information concerning movement of enemy personnel.
 - (3) Be alert to observe and report enemy personnel encountered wearing specific uniforms, especially khaki.
 - (4) Be alert to observe and report any unusual enemy positions, such as artillery emplacements.

b. Requests to higher, adjacent, and supporting units

(1) 3d Marines:

- (a) Provide or arrange for aerial photography as requested.
- (b) Provide long range reconnaissance support through 3d Reconnaissance Battalion.
- (c) Provide information, as obtained, on enemy ground capabilities within the TAOR.
- (d) Provide information, as obtained, on the movement of additional enemy forces into the TAOR.

c. Coordinating instructions

- (1) An aggressive reconnaissance program will be conducted within the ZOA.
- (2) Use will be made of the AN/TPS-21, SID's and infra-red devices for night observation and detection.

4. MEASURES FOR HANDLING PERSONNEL, DOCUMENTS AND MATERIAL.

- a. In accordance with reference (b).
- b. The Battalion Collection Point is LZ COO COO.
- c. Companies will report apprehension of all Vietnamese to S-2.

5. MAPS, CHARTS AND PHOTOGRAPHS.

- a. Reference (a) is the standard map for this TAOR.
- b. Initial map distribution will be made without request. Request for additional maps will be submitted to S-2.

6. COUNTERINTELLIGENCE.

- a. See Appendix 2 (Counterintelligence).

7. REPORTS AND DISTRIBUTION.

- a. As required by reference (b).
- b. Immediate spot reports will be submitted to this Headquarters by the fastest means available on all enemy initiated incidents.

- c. All patrols will be debriefed upon return to their respective CP's and the debrief report forwarded to the Battalion S-2.

1. MISSION. As defined in the basic order.

2. SITUATION:

a. Weather. See Appendix 5 (Climatology) to Annex B (Intelligence).

b. Terrain.

- (1) Terrain in the northeastern portion of the ZOA is characterized by the NUI CAM KHE Hill mass rising to a height of 327 meters.
- (2) The east-central and southern portions of the ZOA are characterized by low-lying flat land utilized for wet-land rice and dry-land crops. These paddy areas extend westerly and northerly from the eastern and southern boundaries for an average distance of 3,000 meters.
- (3) The central portion of the ZOA is characterized by hills rising to a height of 270 meters, and numerous small valleys.
- (4) The western boundary of the ZOA extends along the ridge line of high hills that rise to an elevation of between 500 to 1,000 meters.
- (5) Foot traffic can move freely throughout the ZOA except during the rainy season lasting from September to late December ~~or~~ early January. During this period the Song Tuy Loan becomes a major obstacle. The existing road not may be considered as all-weather, although some portions were closed for short periods during the last monsoon season.
- (6) There are two rivers within the ZOA. The SONG TUY LOAN flows from west to east and roughly bisects the ZOA.

There is a civilian foot bridge and a military pontoon bridge spanning the river at AT 946699 which can accommodate all military traffic. The other river, the SONG YEN, delineates the southeastern boundary of the ZOA, and therefor is no obstacle to vehicular traffic within the ZOA Boundary.

- (7) Observation of the ZOA is possible from the high ground in the western portions of the ZOA.

c. Population. The civil population is governed by the military commander for the district. Authority is delegated to village and hamlet chiefs who are appointed officials subordinate to the District Chief. The District Chief is an appointed military officer (Capt) who is both the civil administrator and military commander of the district.

- (1) Economics. Agriculture and livestock are the primary means of economic income for the local population.
- (2) Transportation. Transportation is generally by foot, supplemented by many bicycles and a few scooters. There are some local buses that carry passengers and produce during the daylight hours.
- (3) Religion. The overall religion in the area is Roman Catholic; however, there are some Buddhist hamlets within the ZOA.
- (4) Language. Vietnamese is the basic language; some of the older people, however, are able to speak French. The school-age children are rapidly accustoming themselves to English.

d. Enemy Forces.

- (1) See Current INTSUMS issued by 3d Marines
- (2) As a rule, the enemy can be expected to make use of the hours of limited surveillance before launching any attack. The VC possess only a limited crew-served weapon fire support capability. To neutralize our fire support advantage they can be expected to attack on nights without moon and on nights without a moon and on nights of heavy rain or fog. Generally, attacks will end by 0300 hours to permit the enemy time to re-protect the mountains before dawn. Viet Cong attacks will usually be planned as raids. They will not normally attempt to hold any ground taken. Their primary objective will be to inflict casualties and seize equipment and materials.
- (3) Enemy mining activities have been increasing within the ZOA while the incidents of S/A fire have decreased, indicating a lack of weapons and/or ammunition on the part of the enemy.

- (4) Local intelligence sources (District Headquarters) have reported increasing numbers of "Hard Core" units within the ZOA. These units are considered well armed and trained. Although these reports have not been substantiated by contact with the enemy, there does appear to be a trend toward mobilization of large units, particularly in the mountainous region on the western boundary of the ZOA.

3. POSSIBLE ENEMY COURSES OF ACTION.

a. Continue present course of avoiding contact.

Enumeration. Present reports indicate that numerous Viet Cong agents are operating within the ZOA. Because of numerous patrols throughout the area necessitating contact with the local populace, and because of the close proximity of indigenous farmlands to friendly positions, it is reasonable to assume that the enemy will continue to employ agents for observing and collecting intelligence information.

b. Adopt tactics of harassment and terrorism.

Enumeration. The civilian population in the area has been generally friendly towards American forces. Particularly, village and hamlet chiefs have made a determined effort toward working with American forces. An attitude of mutual trust has been created. Because of the Viet Cong's need to alienate the people from the government, a program of harassment and terrorism against the population and against friendly forces could be initiated.

- c. Adopt an aggressive mining and booby trap program.

Enumeration. Due to the lack of attacks and the few incidents of mining in the area, it is indicated that the enemy suffers a shortage of weapons and ammunition. In order to maintain a quasi-control of the area, the enemy must initiate an aggressive campaign of mining and booby traps.

- d. Launch a concentrated attack on Marine positions within the ZOA.

Enumeration. Recent local intelligence sources indicate an increase of Viet Cong forces within the ZOA. These reports have not been substantiated by contact with the reported units. There was only one incident of concerted action by the enemy against a reinforced patrol. Recent reverses, especially during the rice harvest, increase the need for an impressive Viet Cong victory to regain lost prestige.

- e. Withdraw from the ZOA.

Enumeration. Since the population in the area has been generally pro-government, and Marine defensive positions are well established, plus the aggressive program of night and day patrolling which precludes the enemy from massing any sizable force, the Viet Cong could decide to employ their "Main Force" units in another area, where their chances of success may be greater.

4. CONCLUSIONS.

- a. Due to the fact that there have been no incidents of concerted unit actions against friendly positions, plus the fact that mining and booby trap incidents are steadily increasing, it is felt that the enemy does not possess the personnel and/or weapons to launch a major attack against friendly positions. It is felt that the enemy will continue this campaign of mining, in conjunction with harassment and terrorism against the civil population, to maintain a quasi-control of the area. It is not felt that the enemy will withdraw completely from the area as this would be too great a loss of prestige from which they might never recover.
- b. It is felt that the Viet Cong will employ their possible courses of action in the following sequence:

- (1) Course a, in conjunction with course c.
- (2) Course b.
- (3) Course d.
- (4) Course e.

Appendix 2 (Counterintelligence) to Annex B (Intelligence) to Operation Plan 5-66

1. The Viet Cong rely heavily on the collection of intelligence before planning any attack or harassment of friendly forces. The employment of women and young children to gather intelligence information is widely used by the VC.
2. As an aid in combatting the collection effort of the VC it is imperative that certain actions be initiated by our forces. These actions include, but are not limited to, the following:
 - a. All military documents will be hand-held while vehicles are standing to preclude their being snatched by a passer-by. Documents will not be taken into Vietnamese markets or shops.
 - b. Military matters are not to be discussed with Armed Forces of Vietnam personnel unless expressly approved by the Battalion Commander.
 - c. Within the DA NANG area personnel working with Viet Cong units have been noted to be Negroid and Caucasian, as well as Oriental. They have been known to wear friendly unit uniforms. It is imperative that unknown or suspicious acting persons within close proximity to friendly positions be identified.
 - d. Care will be taken to keep all indigenous personnel clear of areas of observation. This policy must be applied with common sense. It does not mean that civilians will be removed from their normal living and working areas.
3. Wide use of the sign and countersign must be initiated during the hours of darkness or poor visibility to preclude the infiltration of friendly positions during those times.

Appendix 5 (Climatology) to Annex B (Intelligence) to Operation Plan 5-66

1. PRECIPITATION.

- a. The monsoon climate prevails throughout South Vietnam. The country is affected by the westerly and southwesterly monsoon, resulting in a rainy season for the Delta area and the interior mountainous and plateau region extending from early May until late October or early November. On the other hand, the northeastern coast (DA NANG) has a rainy season that is much shorter, extending from September to late December or early January.
- b. Generally, 75 to 90 percent of the annual rainfall occurs during the monsoon season.
- c. See Tab A (Climatological Data) to Appendix 5 (Climatology).

2. HUMIDITY. (See Tab A)

3. TEMPERATURE. (See Tab A)

4. CLOUD COVERAGE. (See Tab A)

5. VISIBILITY.

- a. The normal mental picture of the rainy season is that of constant rainfall. Actually, this is not the case. Generally, there is an average of four to five hours of sunshine during the day.
- b. During the monsoon season, the average number of hours of sunshine per day in the DA NANG area is 4.9 hours. This represents approximately 41 percent of normal 12 hours of possible sunshine per day.

6. GRACHIN.

- a. Grachin is a prolonged period of widespread fog and light rain or drizzle which primarily affects the northeastern coastal area. It is a persistent low-level stratus phenomenon accompanied by prolonged drizzle, and therefore greatly affects aircraft operations.
- b. The tops of the stratus layer easily extends above 6,000 feet; clear, dry air is usually found above this layer. The clouds

are generally 3,000 to 5,000 feet thick, with halos below 1,000 feet and frequently below 500 feet. Visibility is generally below two miles, and frequently below one half mile.

- c. The Grachin may first appear as early as October, but usually does not become common until late November. It is most frequent in December and disappears by late April.
- d. This phenomenon generally occurs in recurring periods of two to five days duration. Over a five-year period (1952-56), the Grachin was reported on an average of 41 days per year in the Da NANG area.

Operation Plan 5-66

1. South Vietnam is divided into provinces, districts, villages and hamlets. To provide a rule of thumb for judging the role played by these subdivisions, it is easiest to compare them with the following political structures within the United States:
 - a. The province is to the state.
 - b. The district is to the county.
 - c. The village can be compared to a township.
 - d. The hamlet is similar to the American Village or the suburb of a city (as a rule, several hamlets combine to form a village).
2. The ZOA for the battalion falls completely within Quang Nam Province. Primarily the ZOA includes three districts; Hoa Vang, Hieu Duc, and Dai Lac. These districts are not completely contained within the ZOA; the ZOA is composed of sections of each of the districts. (See Tab A (Boundary Overlay) to Appendix 7 (Political Subdivisions).
3. There are seven villages within Hieu Duc district that lie completely or partially within this ZOA. There is one village within Hoa Vang District that is included in the ZOA but is outside the area of current tactical consideration. (3/3 will not initially be concerned with Dai Lac)
4. The known villages are divided into the following hamlets:
