NARRATIVE SUMMARY

From 1 through 10 October the battalion continued its mission within the 3d Marines TAO and began preparations for moving to Dong Ha. On 10 October the Battalion CP Group was placed under the OpCon of the 9th Marines; followed on the 10th through 12th by the remainder of the battalion. On reaching Dong Ha the battalion was re-equipped and administrative work was brought up to date.

On 14 October the entire battalion moved to the C2 Bridge and assumed defense of that position. Work began immediately building fortified positions laying wire and clearing fields of fire. During the remainder of the month the battalion received incoming rounds on a number of occasions, generally of a harassing nature, inflicting minor casualties. Also during this time, the battalion twice deployed two companies as security for a supply convoy to Con Thien. On 26 October the battalion participated in a Search and Destroy Operation providing three companies for a sweep of its assigned AO. After completing its mission in that operation, the battalion was then required to send two companies to reinforce 2/4 which had made heavy contact during this time. This was the only direct enemy contact made by the battalion during the month.

The problem areas have been those typical to construction of a new defensive position, principally a lack of material for overloads on bunkers.

From the first through the tenth of October the 3d Battalion, 3d Marines was mainly involved in the area between Thon Son Lam and Ca Lu. Intelligence reports indicated that the NVA, K-8 Battalion was in this area with the purpose of the interdiction of MSR #9.

On 10 October the 3d Battalion, 9th Marines assumed the defense of the Thon Son Lam perimeter and 3d Battalion, 3d Marines commenced movement to Dong Ha to prepare for movement to the C2 Bridge. On 14 October the 3d Battalion, 3d Marines moved to the C2 Bridge and established a defensive position.

Reports of this area indicate that elements of up to four battalions are now operating in the area of YD 1067. The 27th Independent Battalion (NVA) is believed to be operating in the area of YD 1667.

On two occasions the C2 Bridge perimeter has received a number of rockets believed to be coming from coordinates YD 1069. Mortar attacks have been received outside the defensive wires.

On the afternoon of 20 October an AC was fired on from grid YD 9966 by an estimated enemy company in fortified positions. The company is believed to be the C14 Anti-Aircraft Company.

The battalion displaced again to the C2 Bridge area and wire and radio communications were re-established and set in.
