NARRATIVE SUMMARY

The Battalion continued S/D operations in the Kentucky AO. On 4 2315Z December, Co I executed an ambush north of C-2 Bridge resulting in 2 NVA/VC KIA's. A moderate amount of old ordnance was discovered and destroyed. The Battalion was OPCON to Task Force Hotel and Task Force Bravo during the first part of the month. On 14 December, the Battalion moved to An Hoa and was OPCON to Task Force Yankee for Operation Taylor Common. The Battalion made a helicopter assault 18 December on Hill 375 at 7C167365 and set up Combat Base Mace. Company patrol bases were established in the area and S/D operations were conducted. Large amounts of medical equipment, weapons, uniforms, and ammunition were uncovered. These supplies were found in numerous bunker and hut complexes which were searched and destroyed upon discovery. Most of the complexes were used for R&R centers and were not set up for combat defense. Although many trails and complexes have been found in the Battalion AO, actual enemy contact has been limited to occasional fire fights with small units of 3-5 people. Indications are that the NVA/VC main force has left the area while operations are being conducted and only small unit harassment forces have been left to contend with.
