PART II

NARRATIVE SUMMARY

The Battalion continued assigned operations on Operation Taylor Common. Company patrol bases and Fire Support Bases were established and maintained. Small unit point contacts were frequent, but no large scale, organized resistance was encountered. Numerous bunker complexes and rest areas were discovered and were destroyed. These complexes were unoccupied and for the most part, had been so for several weeks. Numerous weapons and supply caches were also uncovered.

On the 15th of February, the Battalion commenced retrograde operation via An Hoa to Quang Tri Combat Base. On 20 February, the Battalion assumed 2d Bn, 3d Marines AO with the Battalion CP located in Com Lo. Enemy contact was sporadic. There were several mortar and rocket incidents and the Engineers frequently located mines on Route #9.

7. EQUIPMENT

Combat Essential Equipment at 77.7% on 28 February 1969.

8. LOGISTICS

a. Supply

(1) Combat Essential Supplies on hand was 79.2% on February 1969
Critical shortages existed in the following items:

<u>Item</u>	<u>Shortage</u>
Flamethrower	3
Antenna, AS2236	2
Telephone, TA1PT	53
Gas Mask, M17	200
Antenna, RC292	2

- (2) During the month of February, the first 15 days Class V was drawn from the LBU in Hoa with no problems encountered. After the 15th, Class V was drawn from 1SP at Quang Tri. A shortage of Claymore mines and M79 rounds was encountered.

b. Resupply

During the first 15 days of February, resupply was by helicopter. There were no problems concerning resupply during this period. From the 15th on, resupply was by ground transportation with no problems encountered.

c. Evacuation & Hospitalization

- (1) Areas of operation during Taylor Common were mountainous terrain with double canopy. In the Kentucky AO, terrain is flat with little to no cover.
- (2) All medevacs were by helicopters and no problems were encountered.

d. Transportation

- (1) Total mileage on organic vehicles during February was 6167 miles.
- (2) Truck support in the Hoa area was adequate.
- (3) Truck support in the Kentucky AO was adequate.

e. Service

- (1) During Operation Taylor Common and until 15 February, one platoon of Co B, 3d Engineer Battalion rendered assistance in all engineering tasks. Heavy equipment was unobtainable.
- (2) During the rest of the reporting period, the same platoon conducted road sweeps in the Kentucky AO for the Battalion.
- (3) During the first 15 days of February, the Battalion was supported by 4 HBT's from 3d Shore Party Battalion.

9. CIVIC ACTION 7/A

10. ADMINISTRATION

- a. During the month of February, 2 SPM were held and 5 Court Martials are pending. The Battalion Commander held 6 Office Hours and 3 are pending. There were 11 Company Commander Office Hours held and 8 are pending.

- b. R&R continued to be a major morale factor. The Battalion received and used 81 Out Of Country R&R quotas. There were no In Country R&R quotas received.
- c. The morale was considered excellent.
- d. Postal Service was fair.
- e. No liberty was authorized during the reporting period.
- f. Marine Exchange facilities were not available to the Battalion as a whole. Limited Exchange was available for the rear area personnel at Nam O and An Hoa for 1-15 February.
- g. The Battalion administration moved back to Quang Tri from Nam O on the 15th of February.

12. INTELLIGENCE

- a. During the first half of the month, the Battalion continued to participate in Operation Taylor Common. As reported in the previous reporting period, enemy contact continued to be point contacts with units of 4-6 men and no all out resistance was encountered. Several bunker and hut complexes were found along with numerous weapons, food and supply caches. These caches indicated that the enemy probably intended to return to the area. There were two (2) incidents of FSB's and units getting hit by mortar, but it is believed that the enemy could not sustain such attacks because of loss of supplies. On the 19th of the month, the Battalion returned north to operate Quang Tri, Cam Lo, and Mai Loc areas during TWP. During this period, one (1) heavy contact indicated that possibly they were preparing for a major offensive. This was substantiated by numerous agent reports and radio intercepts. There were several instances of rocket and mortar attacks indicating the possibility of numerous amounts of supply in the area. Mine sweep teams have uncovered many mines being laid on the MSR's by the enemy in the area.
- b. Scout/Sniper Teams could not be used effectively in the area of An Hoa because of the heavy foliage. In the Cam Lo area, they could be put to better use because of large fields of fire.
- c. Kit Carson Scouts were considered a big help in patrolling, however, the quality of WOT received during Operation Taylor Common was very poor.
- d. Interpreters were considered a big help during the reporting period, however, the Battalion was unable to obtain a sufficient number to put to optimum use.

- e. Dog Teams helped the Battalion greatly during the reporting period. But, like interpreters, are in short supply.

13. COMMUNICATIONS

- a. From 1-15 February, during Operation Taylor Common, communication over difficult terrain was excellent using the Antenna, AS-2236. The AS-2236 provided FM, VHF communications from the Alpha Command Group in the field direct to the Battalion Rear at Nam O Bridge, 40 miles away.
- b. Over the flat lands of our new AO, communications were good using the AS-2236 and HC-292 antennas. Switchboards and telephones were installed in the Alpha Command's new CP at Cam Lo District Headquarters and the Battalion Rear at Quang Tri. The wire section, also installed wire systems at Con Thien and C2 until the US Army moved into these positions at the end of the month.
- c. At the end of the month, plans were formed to establish more direct telephone communications with the Battalion Rear in Quang Tri using the TRC-27B and existing trunks between Dong Ha and Quang Tri.
- d. One of the main problems encountered in the new AO has been that of numerous overrides. Often different battalions have been assigned the same frequencies. Normally, cooperation between the overriding stations permitted continued operation on these frequencies. In rare cases frequencies were changed. Mutual interference between the 27 antennas in the Cam Lo CP was common. Remoting antennas using the AN/GRA-39 or shifting frequencies within the Battalion seemed to be the only solutions to this problem.
